

Course Description

Getting Started with Machine Learning (KLplus CPE Course)

Description :

Machine learning (ML) is a type of artificial intelligence that's having a profound impact on computing and its uses. Machine learning in business can provide your organization with a competitive edge, now that the use of analytics has become more prevalent. It has the power to transform the ways businesses operate. But often, organizations aren't clear how they can leverage it to help achieve their goals.

In this course, you'll learn what machine learning is, its potential benefits, and associated considerations. You'll also learn high-level steps your organization can take to identify opportunities for machine learning, determine their feasibility, and implement machine learning solutions.

Upon completion of this course, the learner will be able to:

- There is no objective for the Course Overview
- recognize a description of machine learning
- recognize the benefits of machine learning
- identify considerations for using machine learning
- identify the steps required to identify opportunities for machine learning
- identify how to determine the feasibility of machine learning opportunities
- identify the basic steps of the machine learning process
- Knowledge Check: Machine Learning

Learning Objectives :

Estimated Course Duration : 24 minutes (0.5 CPE)

Delivery Method: Online Self-Study

Field of Study : Information Technology

Program Level: Overview
